

Available Case Actions

➤ Note about GTS Case Actions

The following represents the complete list of case actions that can be recorded in the GTS. This list is likely to be shorter than the list of case actions available in your case management system, but it represents those actions that are vital to GTS reports and statistics.

GTS case actions are not always going to match, word-for-word, the corresponding case action in your case management system. Therefore, choose the best option when adding a case action in the GTS.
